The professional teaching portfolio is a vehicle for collecting and presenting evidence of their growth and achievement over time.

(Edited from http://teacher.scholastic.com/professional/futureteachers/professional_port.htm)
A professional teaching portfolio is an organized collection that showcases a professional teacher’s mastery, through documented evidence of their growth and achievement over an extended period of time. The documentation should include but not be limited to student work samples that are criteria based, personal self-reflection, and observations by respected professionals and colleagues.
