MAC DADDY AND THE ISLAND

I’m MAC DADDY. My 18 years old. I’m lost in Washington. I’m lost in the Nopko islands. I was skydiving and the wind blew me off course. I was blowing about 100 mils of course.

When I landed there had been a shipwreck. There were all kinds of stuff on the shore. There was Food, knifes, tools, water proof matches, guns, fishing rods and lots of wood and metal. The island is about 1/2 SQ. mile. It took about 3 days to gather all the stuff.

As I was walking one day I saw that there was big eggs. The eggs were eggs from Godzila. Godzila was gone but the eggs were still there. So I burned the eggs so the would not hatch. But this made the hatch quicker. So they all hatched. Good thing that I had lots of guns. So I shot all of them. They were easier to kill then Godzila because they were smaller.

After not being saved for two months MAC DADDY started to make a ship with the tools and the metal and wood. The first time I tested the ship it sunk. It took me three weeks to finish the ship. The ship liked magnificent. In the ship I put food and water in the ship. Before I left his mother gave me an atlas. So I knew where I was. I sailed for about 10 days.
I sailed to Japan. I wanted to get a plane ticket. So I started to make sushi. I get so good at making sushi I stayed there for 20 years. After 20 years he flies bake home. After I went home I started a sushi restraint.
